

# PatternFly Community Meeting

May 4th, 2021

[www.patternfly.org/v4](http://www.patternfly.org/v4)

# Agenda

## Topics

- Accessibility Update - Jessie
- React Update - Titani, Nicole, Katie
- Beta component promotion candidates - Nicole
- What we are working on - Matt

## Q&A

# Beta Component Promotion

# Candidates for promotion (June, 2021 - 2021.08)

## Banner

A banner is a one-line, full-color, full-width container that can be used to communicate short snippets of information to users. Banners are un-intrusive and non-dismissible, and they only support link buttons.

### Examples

Basic

- Default banner
- Info banner
- Danger banner
- Success banner
- Warning banner

JSX   

# Candidates for promotion (June, 2021 - 2021.08)

## [Button: inoperableEvents](#)

Button prop. An array of events to prevent when the button is in an aria-disabled state.

## [Button: isAriaDisabled](#)

Button prop. Adds disabled styling and communicates that the button is disabled using the aria-disabled HTML attribute.

# Candidates for promotion (June, 2021 - 2021.08)

## Description list

A description list contains terms and their corresponding descriptions.

**Name**

Name

**Namespace**

mary-test

**Labels**

example

**Pod selector**

+ app=MyApp

**Annotation**

2 Annotations

# Candidates for promotion (June, 2021 - 2021.08)

## [FileUpload](#)

A file upload component uploads the contents of a file into the browser for further processing. Once contents are uploaded, you have the option of editing them. While the component can upload any file, it's primarily designed for text files where the context can easily be displayed in the text area.

Simple text file

Drag a file here or browse to upload

Browse... Clear

# Candidates for promotion (June, 2021 - 2021.08)

## [Hint](#)

A hint is in-app messaging that provides a one-step reminder, explanation, or call to action for a page or modal.

[Try it for 90 days](#)

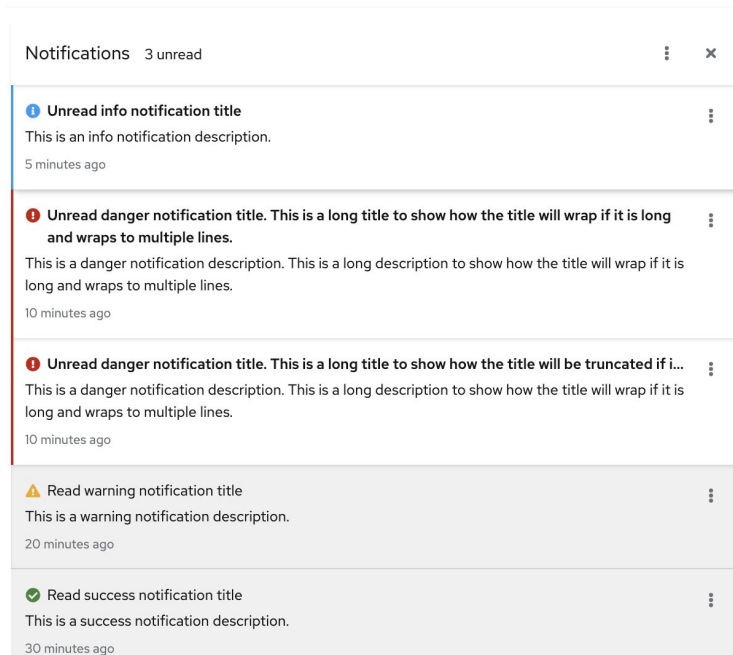

# Candidates for promotion (June, 2021 - 2021.08)

## NotificationDrawer

A notification drawer is a place where users can view and manage notifications that are generated by the system. It allows them to see a list of notifications without having to navigate away from the current screen.

# Candidates for promotion (June, 2021 - 2021.08)

## SimpleList

A simple list provides a list of selectable items that can be shown within a page. Each item is described by a text label. You can divide the list into logical sections using group headers.

---

**List item 1**

List item 2

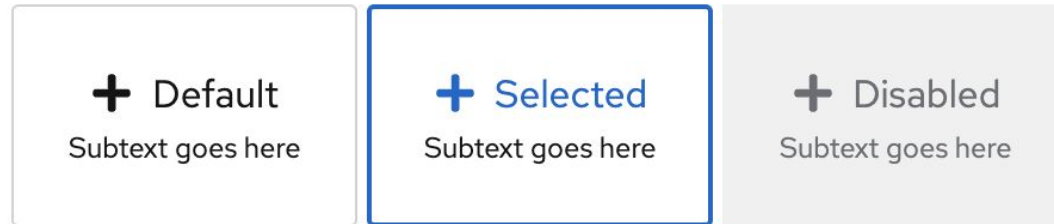

List item 3

# Candidates for promotion (June, 2021 - 2021.08)

## Tile

A tile is a form of selection that can be used in place of a radio button. It's commonly used in forms.

# Candidates for promotion (June, 2021 - 2021.08)

- Between now and the 2021.08 release, we will continue to proactively seek feedback on these beta components
- Calls to action will be sent via the PatternFly mailing list, highlighted at future Community meetings, and other avenues
- As we begin promoting beta components at more regular intervals, we are also open to feedback on our component promotion process.

## Beta feature

This Beta component is currently under review and is still open for further evolution. It is available for use in product. Beta components are considered for promotion on a quarterly basis. Please join in and give us your feedback or submit any questions on the [PatternFly forum](#) or via [Slack](#).

What we're working on...

---

# Design

- [Animation](#)
  - Introduce animation to PatternFly components.
- [Enhancements to notifications](#)
  - Add support for expandable inline alerts and reporting status of active processes.
- [Topology view](#)
  - Define a set of flexible components for drawing topology maps.
- [Three-level vertical navigation](#)
  - Add the potential for an additional level of nesting in vertical navigation menus.

Visit the [PatternFly design workspace](#) to see our complete design backlog and WIP.

# Core HTML/CSS

- [Masthead refactoring](#)
  - Introduce a refactored, more responsive and flexible masthead.
- [Secondary horizontal navigation](#)
  - Explore styling for a secondary horizontal navigation bar.
- [Update toggle group styling](#)
  - Update selected color for a set of toggle buttons to use a lighter blue.
- [Theming](#)
  - Work on a flexible approach to support dark theme or other future theming requirements.
- [Real-time form field validation](#)
  - Add the ability to display validation criteria for names, passwords, etc, as part of any text input.
- [Password strength meter](#)
  - Demonstrate a password strength indicator added to a login form.

# React

- [Log viewer](#)
  - Introduce a native PatternFly log viewer component.
- [Add "view more" action to a Select menu](#)
  - Add a View more action at the bottom of a select menu to enable incremental loading of long option lists.
- [Composable dropdown menus](#)
  - Demonstrate how to create custom, modular dropdown menus by attaching the Menu component to another element.
- [Complex actions in a table row](#)
  - Support any combination of action components in table rows.
- [New list variants](#)
  - Add plain lists, lists with horizontal separators, and lists with leading icons.

Visit the [PatternFly feature roadmap](#) to see our complete feature backlog and WIP.
