

PatternFly Community Meeting

August 31st, 2021

www.patternfly.org/v4

Agenda

Topics

- Beta Component Promotion Candidates - Nicole
- New Extensions on patternfly.org - Nicole
- PatternFly Core updates - Michael
- PatternFly React updates - Zack, Katie, Titani, Cooper, Nicole
- What we are working on - Matt

Q&A

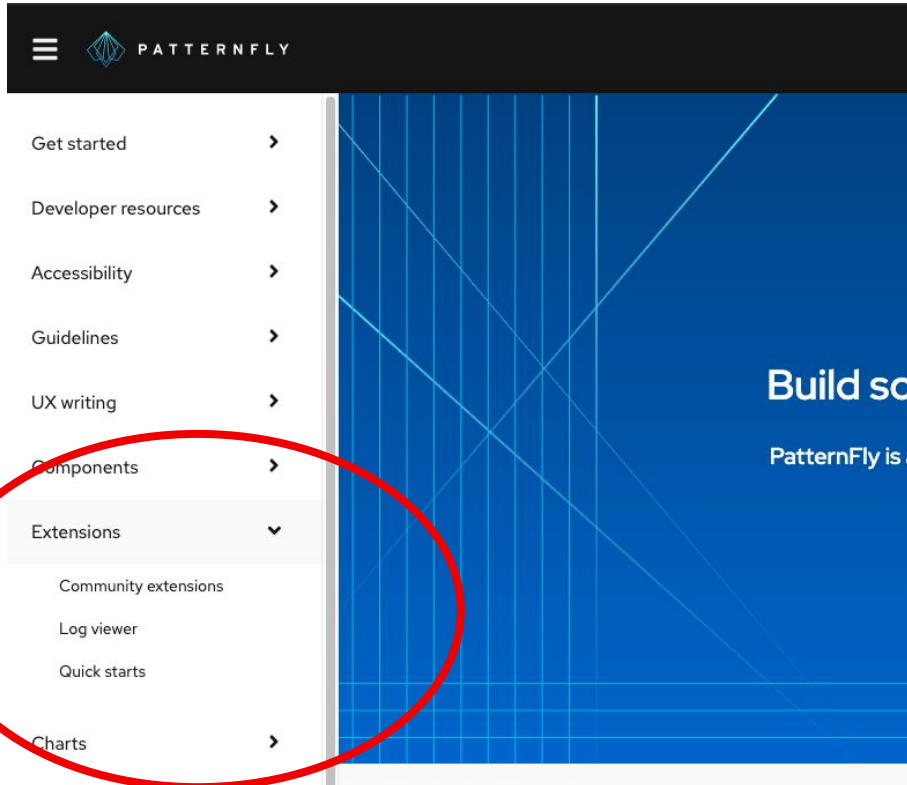

Beta component promotion candidates

- [List of candidates](#)
- Scheduled to be promoted during the mid November.
- Once a component is promoted out of 'beta', it's API will not be altered unless it's a breaking change release.

New 'Extensions'

- Extensions are solution based projects. They are more complex and use case specific than a foundational PatternFly component.
- Community extensions are extensions that are contributed by and maintained by PatternFly community members.
- Other extensions listed under 'Extensions' are UXD extensions. They are fully supported by the Red Hat User Experience team and are often used by multiple Red Hat products.

What we're working on...

Design

- [Visual Refresh](#)
 - Define the next generation of PatternFly look & feel
- [Revise selected states for tiles and cards](#)
 - Update selected state styling to be less confused with focus states in the Chrome browser.
- [Add key-value filtering to type-ahead select](#)
 - Show how a type-ahead select component can be used so select attribute:value pairs from known options.
- [Filter patterns](#)
 - Revisit and enhance patterns for supporting advanced filter and search use cases.
- [File upload enhancements](#)
 - Support multiple file uploads.
- [Label enhancements](#)
 - Add compact and editable label groups.

Visit the [PatternFly design workspace](#) to see our complete design backlog and WIP.

Core HTML/CSS

- [Scalable vertical navigation](#)
 - Add the potential for an additional levels of nesting in vertical navigation menus.
- [Stepper component](#)
 - Add a stepper component to reflect progress and navigate through sequential tasks.
- [Horizontal table scrolling with sticky columns](#)
 - Allow a table to scroll horizontally while keeping some number of columns always visible.

React

- [Refactor dropdown components to use a composable approach](#)
 - Re-build dropdowns and selects to use composable approach for better flexibility.
- [Masthead refactoring](#)
 - Introduce a refactored, more responsive and flexible masthead.
- [Back to top component](#)
 - Allow users to return to the top of a long scrolling page in a single click.
- [Auto-complete search](#)
 - Add auto-complete behavior to the search input component to expose a list of suggestions as the user types.
- [Disabled tabs](#)
 - Add a disabled variant for the tabs component. The user can place a tooltip on a disabled tab as they would for other disabled controls.

Visit the [PatternFly feature roadmap](#) to see our complete feature backlog and WIP.
